

GOG OF MAGOG

After vote, Putin promises to stand up to west

Voice of America News reports: "Under Russian President Dmitry Medvedev, Russia has found common ground with Washington — on shipping war supplies to Afghanistan, halting the sale of anti-aircraft missiles to Iran and joining the World Trade Organization.

With Prime Minister Vladimir Putin leading all polls prior to the presidential vote, though, the question of how Russia's foreign policy would change under his return to the presidency is coming into focus.

In a 7,500-word foreign policy essay the prime minister is promising a Russia with sharper elbows that vigorously pushes back against the West and forces it to take Moscow's views into account.

Writing that 'Russia is only treated with respect when it is strong and stands firm on its own two feet,' he says 'the only way to ensure global security is by doing it together with Russia, not by trying to 'demote' it, weaken it geopolitically, or undermine

its defensive potential...' (President Dmitry wanted a cooperative spirit with America and the West. Vladimir Putin wants to stand up against the U.S.A. and its Western partners. Putin 'elected Russian president'

BBC News reports: "Vladimir Putin has been elected Russian president for the third time, exit polls suggest, after spending the last four years as the country's PM.

The exit polls gave Mr. Putin about 60% of the vote, meaning that he should avoid a run-off with his nearest rival, Communist Gennady Zyuganov.

Officials say turnout was higher than for the last election in 2008.

But opposition groups have reported

widespread fraud, with many people voting more than once.

They have called for mass protests in central Moscow...

Meanwhile tens of thousands of supporters of Mr. Putin have gathered with Russian flags and banners outside the Kremlin for a concert to celebrate his victory.

Slogans on the banner included 'Putin — our president' and 'We believe in Putin', but there were indications that some participants had been ordered to attend..."

Russia election: Monitors refuse to recognize Putin win

BBC News reports: "A monitoring group set up by protesters in Russia has refused to recognise the results of the presidential election which returned Vladimir Putin to power.

The League of Voters said the poll had been marred by widespread ballot-rigging and was an insult to civic society in Russia.

Mr. Putin, it added, won 53%, not 63.6% as reported officially. Such a result would have still brought him

victory.

A senior election official said the League was not in a position to judge.

Mr. Putin was re-elected for six years having served two previous terms as president between 2000 and 2008.

Putin: Russia needs stronger military

BBC News reports: “Russian Prime Minister Vladimir Putin has backed the modernisation of his country’s military, less than a fortnight before the presidential vote.

‘We must not tempt anyone with our weakness,’ he wrote in a newspaper...

In his article published by state newspaper *Rossiiskaya Gazeta*, he said Russia was planning to spend 23tn rubles (£487bn; \$772bn) over the next decade on 400 intercontinental ballistic missiles and more than 600 warplanes as well as nuclear submarines and S-400 missile defence systems.

Putin pledges 400 ICBMs for Russia in 10 years

SpaceDaily.com reports: “Russia’s armed forces will receive over 400 modern intercontinental ballistic missiles (ICBMs), more than 100 military spacecraft and over 2,300 new tanks within the next 10 years, Prime Minister and presidential candidate Vladimir Putin said.

Earlier media voiced fears that by 2020, Russia’ ICBM arsenal could reduce by more than half as over 400 missiles would go beyond their maximum service life without timely replacement.

‘Within the next decade, the armed forces will receive more than 400 modern ground- and sea-based intercontinental ballistic missiles, eight ballistic missile submarines, about 20 general purpose attack submarines, over 50 surface ships and some 100 military-purpose spacecraft,’ Putin wrote in a new article for the *Rossiiskaya Gazeta* government daily.

He said the number will also include ‘over 600 modern aircraft, including fifth-generation fighters, more than a thousand helicopters, 28 regimental sets of S-400 (SA-21 Growler) surface-to-air missile systems, 38 division sets of Vityaz air defense systems, 10 brigade sets of Iskander-M (SS-26 Stone) tactical missile systems, more than 2,300 modern tanks, some 2,000 self-propelled artillery systems and guns, as well as more than 17,000 military vehicles’...”

Russia would use nukes to stave off threats — General Staff

RIA Novosti reports: “Russia would use nuclear weapons in response to any imminent threat to its national security, Chief of the Russian General Staff Gen. Nikolai Makarov said.

‘We are certainly not planning to fight against the whole of NATO,’ Makarov said in an interview with the *Ekho Moskvy* radio, ‘but if there is a threat to the integrity of the Russian Federation, we have the right to use nuclear weapons, and we will.’

The general said Russia’s nuclear deterrent is the cornerstone of strategic stability and serious efforts are being taken by the Russian government to modernize the country’s nuclear triad.

The Russian Defense ministry is planning to acquire at least 10 Borey class strategic nuclear submarines, thoroughly modernize its fleet of Tu-160 Blackjack and Tu-95 Bear strategic bombers, and equip its Strategic Missile Forces with formidable Yars mobile ballistic missile systems.

Makarov also stressed the importance of maintaining highly-efficient, mobile conventional forces...” **(The New York Times reported that Obama had entered into a secret contract with Russia. Muslims announce plans to 'eradicate' Christianity

WND.com reports: "Members of the Muslim jihadist group Boko Haram are vowing to 'eradicate Christianity' in Nigeria.

Reports coming out of Nigeria over the past several days show that the group whose name means 'Western education is evil' is launching a new terror campaign aimed at killing Christians and Jews in northern Nigeria.

The Nigerian news site *Bikya Masr* reports that the jihadi group has declared war on all Christians living in northern Nigeria.

SANCTITY OF LIFE

Infanticide should be legal, Oxford experts say

The Telegraph.co.uk reports: “A group of medical ethicists linked to Oxford University has argued that killing young babies is no different from abortion, and should be allowed even when there is nothing physically wrong with the child.

Publication of the article, in the Journal of Medical Ethics, part of the British Medical Journal group, has raised a storm of protest.

However, the journal’s editor, Prof Julian Savulescu, director of the Oxford Uehiro Centre for Practical Ethics,

has defended his decision, saying it was the job of such publications to air all sides of all arguments – however radical.

Two former Oxford associates of his, Alberto Giubilini and Francesca Minerva, argued that there was no moral difference between abortion and killing babies in their article, *After-birth abortion: Why should the baby live?*

They argued: “The moral status of an infant is equivalent to that of a fetus in the sense that both lack those properties that justify the attribution of a right to life to an individual.”

Study: Stem cells taken from healthy part of heart ‘heal’ heart attack scars

Sky News reports: “Stem cells can be used to heal scars after heart attacks, bringing regenerative treatments a step closer.

The study found the amount of permanent scarring on the heart was reduced by half compared to conventional treatment and led to the development of new muscle.

However, the treatment produced no significant change in ‘ejection fraction’ — a measure of the heart’s pumping capacity.

The Caduceus trial recruited a total of 25 patients with an average age of 53 who had all suffered a heart attack in the previous month.

Seventeen received coronary artery

infusions of 12 to 25 million stem cells derived from healthy tissue taken from their own hearts.

The remaining eight underwent standard post-heart attack care.

A year later, the proportion of the heart left scarred in the stem cell-treated patients had been reduced from 24% to 12%. Scientists at U.S. lab detect hints of elusive “God particle”

Reuters reports: “Scientists said they have gotten even closer to proving

Analyzing data from some 500 trillion sub-atomic particle collisions designed to emulate conditions right after the Big Bang when the universe was formed, scientists at Fermilab outside Chicago produced some 1,000 Higgs particles over a decade of work.

‘Unfortunately, this hint is not significant enough to conclude that the Higgs boson exists,’ said Rob Roser, a physicist at Fermilab, near Chicago, in explaining the findings being presented at a conference in La Thuille, Italy.

A NUCLEAR IRAN

Iran 'May have tested nukes in North Korea in 2010'

Israel National News reports: “The Sunday morning edition of Germany’s *Die Welt*, quoted by leading journalist David Goldman in Pajamas Media, reports that Western intelligence agencies detected two nuclear weapons tests in North Korea in 2010, and that one or both of them might have been conducted for Iran. The author is the respected German analyst and former top official Hans Rühle, who quotes new documentation showing that the Iranian regime began its drive for nuclear weapons as early as 1984, under the direct orders of Ayatollah Khomeini.

Evidence of the 2010 nuclear tests in North Korea was published February 3 in *Nature* magazine, citing the work of the Swedish nuclear physicist Lars-Erik de Geer. The scientist analyzed data showing the presence of radioisotopes that indicated a uranium bomb had exploded and after a year of work, wrote *Nature*, ‘concluded that North Korea carried out two small nuclear tests in April and May 2010 that caused explosions in the range of 50-200 tons of TNT equivalent.’

Rühle reasons that North Korea would probably not have been secretive about the testing if it were carried out for its own nuclear arsenal, and notes that while its previous nuclear tests used bombs with a plutonium core, the 2010 tests apparently employed

enriched uranium. The most likely explanation for this, Rühle concludes, ‘would be that North Korea conducted a nuclear test for a foreign entity, in this case, an Iranian explosive.’...” **(Persia in Ezekiel 38:5 changed its name to Iran in 1935. Amano said that since late last year, Iran had tripled monthly output of higher-grade enriched uranium.

Amano also outlined his agency’s failure in recent months to get Iran to grant access to locations, scientists and documents in order to clear up allegations of nuclear weapons development projects.
